

Grain Moisture Meter (with volume-weight)

Model: LDS-1G

Technical parameter:

Measuring object: nonmetallic granulated materials such as cereal, wheat, rapeseed, soybean, vegetable seeds, corn, feed and so on

Measuring error: $\leq \pm 0.5\%$ (main moisture range)

Measuring range: 3-35%

Working environment: 0-40℃

Temperature compensation: automatic

Attached function: volume-weight conversion

display, sample weight display, temperature display, average moisture content calculation

Calibration: 4 points calibration, unlimited sample (20 common varieties have been calibrated in advance, can be tested directly)

Working power: AC/DC, DC6V (4 AA dry batteries)/ special external power adapter
